

Press release

October 3rd, 2013

New Meyn Demo and training centre now open

On October 2nd 2013 Meyn officially opened its expanded Demo and training centre, when Scott Russell (Global Sales Director of Meyn) and Willem Wals (owner of Vleeshandel Topkip B.V. and the premises in which the Meyn Demo and training centre is located) unveiled a nameplate. The new Meyn Demo and training centre gives us the possibility to extend our training portfolio and will allow us to set up demonstrations for our customers with our complete range of state-of-the-art cut up and deboning solutions.

The expanded Meyn Demo and training centre features all solutions with which a huge variety in cut up and deboned end products can be made. The first demonstration sessions are already planned for the week of October 7-11, when Meyn will organise a BoneScan 440 ADX demonstration week which will be attended by customers from different countries.
